

STANLEY UKEJE

FULL STACK SOFTWARE ENGINEER | PRODUCT ENGINEER

Sharjah, United Arab Emirates • +971 50 390 0735 • stan@stanleyukeje.com
stanleyukeje.com • github.com/stanleyukeje • linkedin.com/in/stanleyukeje

PROFESSIONAL SUMMARY

Full Stack Software Engineer with experience building, deploying and maintaining production web applications across fintech, marketplaces, SaaS and social platforms. Skilled in Next.js, React, TypeScript, PostgreSQL, Supabase, Docker and cloud infrastructure. Comfortable joining existing codebases, shipping new features, solving production issues and delivering reliable software in fast-moving teams. Available immediately for remote, contract, freelance and full-time software engineering opportunities.

CORE COMPETENCIES

Full Stack Development • API Integration • Database Design • Cloud Deployment • Performance Optimization • Production Support

TECHNICAL SKILLS

Frontend: Next.js • React • TypeScript • Tailwind CSS

Backend: Node.js • REST APIs • Supabase **Database:**

PostgreSQL

Cloud & DevOps: Docker • Cloudflare • Coolify • Linux

Tools: Git • GitHub • Playwright • ESLint • VS Code

EXPERIENCE

Full Stack Software Engineer

2020 – Present

Design, build, deploy and maintain production web applications, owning the complete software lifecycle from architecture and database design to deployment, monitoring and continuous improvement.

Responsibilities & Achievements

- Designed and developed full-stack applications using Next.js, React, TypeScript and Tailwind CSS.
- Designed PostgreSQL databases and implemented secure authentication using Supabase.

- Integrated payment services, email infrastructure, webhooks and third-party APIs.
- Managed end-to-end production deployments, domain configuration, Docker containers, Cloudflare networking and Coolify infrastructure.
- Diagnosed production issues, optimized application performance and continuously shipped product improvements.
- Implemented scalable, maintainable solutions with a strong focus on code quality, reliability and long-term maintainability.

PRODUCTION PROJECTS

BayRight — Digital Payments Platform | <https://bayright.com> Engineered a fintech platform for utility payments and digital transactions. Next.js • React • TypeScript • PostgreSQL • Supabase • Docker

Yike — Marketplace Platform | <https://yike.ng>
Engineered a real estate marketplace with advanced search, listings and user management.
Next.js • React • TypeScript • PostgreSQL • Supabase

BamSignal — Social Discovery Platform | <https://bamsignal.com>
Engineered a social discovery platform with authentication, messaging and premium subscriptions.
Next.js • React • TypeScript • PostgreSQL • Supabase

Rentovix — Property Rental Platform | <https://rentovix.com>
Engineered a rental management platform with dashboards and property workflows.
Next.js • React • TypeScript • PostgreSQL

LogicVault — Business Operations Platform | <https://logicvault.org>
Engineered a business operations platform for workflow automation and operational management.
Next.js • React • TypeScript • PostgreSQL • Supabase

EDUCATION

Bachelor of Science (B.Sc.), Computer Science
Enugu State University of Science and Technology (ESUT)

Higher National Diploma (HND), Computer Science
Institute of Management Technology (IMT)

CERTIFICATION

Full-Stack Development Bootcamp

upGrad Campus • 2022

AVAILABILITY

Available immediately for Remote, Contract, Freelance and Full-Time Software Engineering roles.
