

STANLEY UKEJE

FULL STACK SOFTWARE ENGINEER

Abuja, Nigeria | +2347066621779 | stan@stanleyukeje.com
stanleyukeje.com | github.com/stanleyukeje | linkedin.com/in/stanleyukeje

PROFESSIONAL SUMMARY

Full Stack Software Engineer with practical experience designing, building, deploying, and maintaining production web applications across fintech, marketplace, SaaS, and social platforms. Experienced across the software development lifecycle including application architecture, frontend development, backend development, API integration, database design, cloud deployment, debugging, testing, maintenance, and continuous product improvement. Strong analytical and problem-solving skills with the ability to quickly understand existing codebases, deliver reliable software, and collaborate effectively within remote engineering environments.

CORE COMPETENCIES

Full Stack Development | Frontend Development | Backend Development | REST API Integration | Database Design | Application Architecture | Software Development | Software Maintenance | Debugging | Performance Optimization | Authentication | Payment Integration | Cloud Deployment | Docker | Production Support | Technical Documentation | Collaboration

TECHNICAL SKILLS

Frontend: Next.js | React | JavaScript | HTML | CSS | Tailwind CSS

Backend: Node.js | REST APIs | Authentication | Third-party API Integration

Databases: PostgreSQL | Supabase

Cloud & Infrastructure: Docker | Linux | Cloudflare | Coolify

Tools: Git | GitHub | VS Code | Chrome DevTools | Browser Developer Tools | Playwright | Postman | Microsoft 365 |

Google Workspace | Slack | Microsoft Teams | Zoom | Trello

Operating Systems: Windows | macOS | Linux | Android | iOS

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer | 2020–Present

- Designed and developed responsive full stack web applications.
- Built modern frontend interfaces using Next.js and React.
- Developed backend services and REST APIs using Node.js.
- Designed PostgreSQL databases and implemented authentication using Supabase.
- Integrated payment gateways, email services, and third-party APIs.
- Managed production deployments using Docker, Cloudflare, and Coolify.
- Diagnosed production issues and resolved software defects.
- Optimized application performance and reliability.
- Maintained existing codebases and delivered continuous product improvements.
- Produced maintainable, scalable, and structured software solutions.

SELECTED PROJECTS

- BayRight — Designed and developed a fintech platform supporting utility payments, digital transactions, authentication, and payment integrations.

- Yike — Designed and developed a marketplace platform featuring search, listings, messaging, and user management.
- BamSignal — Built a social discovery platform with authentication, messaging, and subscription functionality.
- Rentovix — Developed a rental management platform with dashboards and workflow management features.
- LogicVault — Built business workflow software supporting operational management and process automation.

ENGINEERING EXPERIENCE

Application Architecture | Full Stack Development | Frontend Development | Backend Development | REST APIs | Database Design | Authentication | Payment Integration | Cloud Deployment | Debugging | Performance Optimization | Software Maintenance | Production Support | Technical Documentation | Continuous Improvement

EDUCATION & CERTIFICATION

B.Sc. Computer Science | Enugu State University of Science and Technology (ESUT)
HND Computer Science | Institute of Management Technology (IMT)
Full-Stack Development Bootcamp | upGrad Campus | 2022
